## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on 02/12/04. These drawings are acceptable.

## **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Samuel Frost on 04/23/04.

The application has been amended as follows:

### **In the claims:**

- a) claim 26, line 1, replace "and" with - - or - -.
- b) please cancel claim 27;

*(note: it is stated that claims 22-25 were cancelled in the amendment dated 11/26/03 submitted by the applicants; additionally, the Complete Marked-Up Copy of Claims prepared by USPTO dated 12/17/03 and the Miscellaneous Action of 01/12/04 acknowledge the cancellation of claims 22-25).*

3. The following is an examiner's statement of reasons for allowance: the applicant's reply explicitly presents reasons why the instant claims are patentable over the reference. Refer to the

Art Unit: 1745

amendment dated 02/12/04 for further details. In particular, the primary reason for the allowance of the claims is the inclusion, in all of the claims, of the steps of supplying one part of the oxidant to the oxidant inlet means of the fuel cells for reaction to generate electrical power and heat; providing a catalytic reactor for promoting reaction of the fuel and the oxidant, supplying the fuel to the catalytic reactor and supplying another part of the oxidant to the catalytic reactor in an amount less than the stoichiometric amount required for the combustion of the fuel supplied to the catalytic reactor, to ensure complete consumption of the other part the oxidant, thereby generating a flow of heated and humidified fuel; supplying the heated and humidified fuel to the fuel inlets of the fuel cells, for reaction with said one part of the oxidant to generate electricity and heat; and supplying the fuel and the other part of the oxidant to the catalytic reactor, prior to supply thereof to the fuel cells. The instant application is now deemed to be directed to an unobvious modification over the invention patented in patent 6416891 to Condit et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
